

CHASSIS NUMBER

The first two digits of the chassis number are the first two digits of the basic model number of the vehicle—such as 32 for a Dasher or 17 for a Rabbit.

The third digit is the model year of the vehicle—so a “328” is a 1978 Dasher.

The last six or seven digits are the consecutive production numbers for that specific model year. Here is an example:

This System Applies For Models From August 1964.

FOR ENGINE NUMBERS; PLEASE REFER TO THE CHASSIS AND ENGINE NUMBERS CHART, LISTED BEFORE EACH MODEL SECTION.
